

Commission of Inquiry Respecting the Death of Donald Dunphy

NEWS RELEASE

Update on Status of Release of Reports

On November 7, 2016, the Commission received new information that was forwarded to the RCMP. The RCMP advised the Commission that this information required further investigation. To avoid the possibility of tainting evidence, the RCMP requested the Commission to delay the public release of the key reports. These reports had already been released to the parties with standing.

Today the RCMP has advised that it will require a further 48 hours to complete interviews regarding the new information. The Commission is committed to transparency but recognizes the importance of respecting the investigative process.

The Commission expects to have a further update for the public within 48 hours.
